Retail Package

Datasheet

> Digital signage solution for a comprehensive message to your customers.

> Easy creation of templates and content play-out .

> ERP integration possibilities for automation in retail environment.

Digital signage creates new opportunities and possibilities to show moving images, pictures with animation or plain text in various template structures. It also allows you to show the right message at the right time for customers using clever scheduling functionality.

Toshiba offers a digital signage package that can be integrated with retailers' ERP system, capturing pricing, product information and imagery and seamlessly displaying the content on the retailers' screens in the floor shop.

The Retail Package comes in different screen sizes from 43" to 65", either as a cloud or server-based solution depending on the needs and application.

KEY SPECIFICATIONS

We at Toshiba believe that the most successful organisations are those which communicate information in the most efficient way. Professional products all aim at helping to achieve this goal.

Display

Together Information is Toshiba's vision for how people and organisations create, record, share, manage and display ideas and data.

It is based on our belief that the most successful organisations are those that communicate information in the most efficient way.

We make that possible through an integrated portfolio of industry-specific solutions, all of which reflect Toshiba's commitment to the future of the planet.
