

Accessibility

Highlight Feature

- > Wheelchair users can receive full benefits of the MFP
- > Easy access for closing the document feeder
- > Documents that cannot be fed through the document feeder can be copied from the glass
- > Easy-to-access control panel that can be tilted

Your challenge

Operating MFPs with a physical challenge can be trying and unproductive – yet millions of users face this situation every day. To succeed, they need flexible solutions that adapt to a user's unique needs and capabilities.

Our solution

We understand the specific needs of people with varying levels of abilities. Toshiba's MFPs provide a control panel that can be tilted and is user-friendly even for users in a wheelchair. In addition, to meet these needs, we have designed an Accessible Arm accessory. This allows all users to fully access the platen to scan, copy or fax all types of documents.

By empowering employees with the tools they need to get the job done, you'll benefit from higher retention rates, lower turnover costs and increased productivity.

ACCESSIBILITY

Your benefits

Toshiba's MFPs provide a control panel that can be tilted¹⁾ and allows all users to easily access and operate the control panel. In addition, our Accessible Arm accessory is a lightweight apparatus that extends the reach of users so that the document feeder can easily be closed. This allows access to the MFP's platen and the ability to scan, copy and fax documents which cannot be fed through the document feeder. As a result, users, such as those in a wheelchair, can gain full access to all of the capabilities of the device.

Equipping their Toshiba MFPs with these features can help companies comply with laws and regulations, providing employment opportunities for those with disabilities.

Where to use

Any company that employs individuals with a physical limitation or has customers needing access to the system can benefit from the Toshiba MFP including an Accessible arm accessory. By having a more accessible MFP, companies provide a work environment that makes employees and/or users feel more empowered and improves their job satisfaction levels.

- > Government
 - Complies with laws and regulations
- > Education
 - Allows teachers and students with disabilities to fully access the MFP
- > Non-Profit
 - Provides a more welcoming environment to employ individuals that have a physical limitation

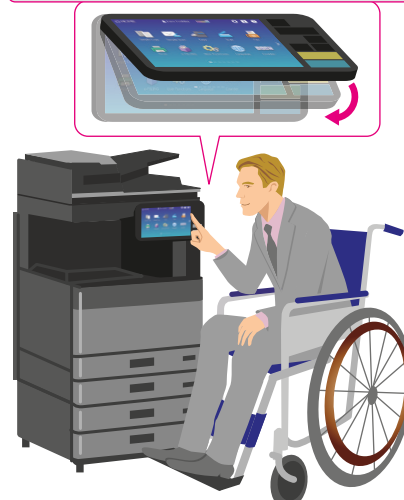

The Document Feeder left open cannot be closed.

The Accessible Arm helps close the Document Feeder.

The control panel that can be tilted provides ease of operation!

¹⁾ The tilt angle varies depending on the model.
