

# Google Cloud Print App

## Highlight Feature

---

- > Print from mobile devices while you are on the move
- > Remote printing from Chrome Book, Windows or Mac computers without having to install a printer driver
- > Utilise a Toshiba MFP even when not connected to the network

### Your challenge

Besides using Mac and Windows computers in the office or on school premises, in recent years it has become the norm to have the need to print from portable devices, such as tablets and smart phones. The need to install printer drivers in order to print is inconvenient. In addition, users outside the office and not on your network are not able to print. However, productivity and efficiency can only be maintained if we are able to achieve remote printing without the need to install printer drivers.

### Our solution

Integration of the Toshiba e-BRIDGE Next MFP and Google Cloud Print has made difficult tasks possible. Now you can print from mobile devices and notebooks, even if you are not in the office or on the network. And all this without having to install a printer driver.

Boost your efficiency!

## CLOUD PRINT APPS

### Your benefits

You can print from Android tablets and phones, iPads and iPhones, Chrome Books, Windows and Mac PCs, by registering the Toshiba e-BRIDGE Next MFP in the Google Cloud Print account.

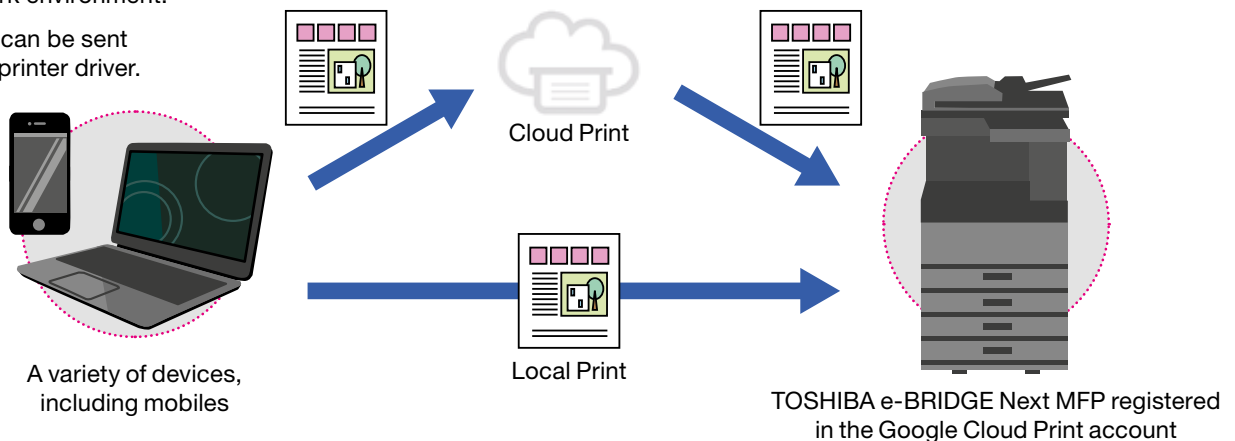

You do not need to be on the network environment or install the printer driver.

Whether you're in the office, school, or even on the road, you can send a print job from your device, even if you use multiple devices and multiple platforms. Integration of the Toshiba e-BRIDGE Next MFP and Google Cloud Print is the answer to your printing needs, anytime, anywhere!

You can also send a print job to the MFP in a distant location, enabling the sharing of data.

### Print anywhere

- Print jobs can be sent from outside the network environment.
- Print jobs can be sent without a printer driver.

For more information and a complete list of MFPs with this feature please contact us:

### Where to use

High productivity with quick and efficient data verification and information sharing has become a concern in today's fast-paced work environment. It is necessary to print from a variety of portable devices as well as print by remote access.

- > Education
  - Students and staff are able to print data using personal computers and mobile devices, regardless of whether they are connected to the school network or not.
- > General office
  - Even temporary users, such as business travelers who are not on the network or have not installed the printer driver can print data.
  - Even those who have portable devices that are not usually connected to the company network still need to print data.
- > Hotel
  - Guests can print data from their mobile devices in the business center of the hotel.
