

Manufacturing

- › The manufacturing market is diverse and complex arena which can require tailor-made solutions for each and every individual application.
- › Toshiba as a global player in manufacturing is familiar with the complex processes involved in creating a diverse range of products.
- › The comprehensive Toshiba portfolio of products and solutions are designed to support and enhance all your processes and workflows to ensure maximum efficiency and reliability.
- › Alongside providing the right solution for you it is core value of Toshiba that we aim to minimise the impact our products have on the environment and strive to develop solutions for a greener tomorrow.

PRODUCT PORTFOLIO

- 1 Our single- and multifunction printers come in various different sizes, speeds and configuration possibilities. But what they all have in common is their outstanding image quality and intuitive usage.
- 2 Toshiba's range of barcode printers covers all aspects of your labelling needs. Whether you need a portable printer or wide-web pallet labels, we can provide you with the perfect device.
- 3 Our software solutions are as individual as your needs. Covering all areas of modern document and information workflows our applications can be customised to match your individual requirements.

GIVING YOU THE COMPETITIVE EDGE

Manufacturing is the core of all kinds of industries and results in a vast range of products being created. Therefore, the requirements a manufacturing company has are just as diverse.

From clothing, automobiles and electronics to chemicals, foods and medicals - our customised systems and solutions are designed to reduce the total cost of ownership, increase productivity and streamline processes. Our hardware and software solutions integrate seamlessly into your existing workflows and networks and can be configured to match your individual processes.

With our extensive portfolio we cover the needs of the different steps in manufacturing and helps you stay flexible enough to adapt to future product demands. Our products and solutions are ideal for:

- > Research & Development
- > Product Design
- > Assembly
- > Logistics
- > Marketing
- > Back office

All these areas require a smooth flow of information to ensure process optimisation. This also includes protecting your data from unauthorised access. We offer various possibilities of securing your data to help you meet the increasing security challenges of today's world.

At Toshiba we also believe that state-of-the-art technology and usability should not exclude each other. We create all our products with your needs in mind. Our human-centric approach ensures that our systems and solutions are intuitive to use and easy to administer.

SUSTAINABILITY

Manufacturing requires natural resources and thus has an impact on the environment. However, it is the aim of every responsible company to reduce this impact. At Toshiba all our business processes, technology and products are designed to help foster a more sustainable society. We offer a range of unique eco-friendly solutions to supplement your environmental strategy.

Carbon Reduction

We aim to lessen the negative impact of greenhouse gasses in our manufacturing process through our energy-efficient production facilities. In addition, our industry-leading carbon offsetting scheme helps you achieve your carbon reduction pledge.

Saving resources

Saving natural resources is good for the environment. And as a manufacturing company you also benefit economically. However, you do not want to compromise on efficiency. Therefore, we have developed products and tools which will let you fulfil your goals to reduce environmental burdens associated with your business and at the same time improve your control of assets and costs in a single stroke.

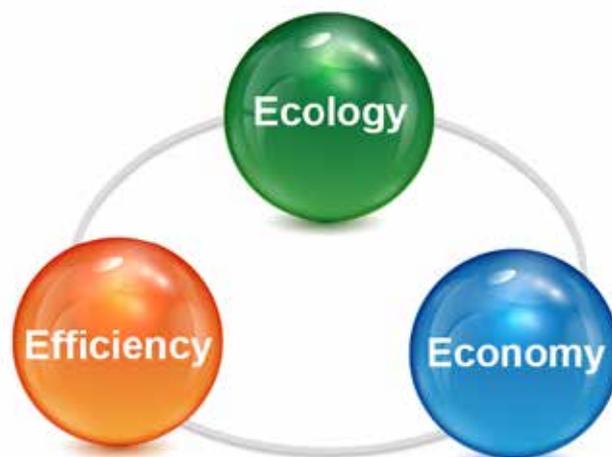

The Eco-MFP

With the e-STUDIO307LP/RD 301 Toshiba has a system, which uses erasable toner. By using this special blue toner for all your temporary documents, you can reuse the paper several times and save up to 80% of resources.

The Energy Manager for office

Finding ways to reduce power consumption is becoming more and more important. Toshiba's Energy Manager for office is a smart software solution, which optimises the power consumption of PCs and e-BRIDGE MFPs within your network. Not only will this cut your energy costs, without impacting your productivity, you will also contribute to a greener tomorrow.

To find the ideal combination of products and solutions, we offer you our Managed Document Services programme. It will not only identify the hidden expenses in your document and information workflow to reveal potential savings, but will also focus on the ecological aspects of your business.

The three core principles our products and solutions are based on.

The Toshiba Eco-MFP - revolutionising the way we print. For more information on our eco product portfolio, please visit us at www.eco.toshiba.eu.

If you want to find out how our products and solutions can enhance your business workflow, please contact us.

Together Information is Toshiba's vision for how people and organisations create, record, share, manage and display ideas and data.

It is based on our belief that the most successful organisations are those that communicate information in the most efficient way .

We make that possible through an integrated portfolio of industry-specific solutions, all of which reflect Toshiba's commitment to the future of the planet.
